EDU-H201AUC-KIT

HDBASE-T EDUCATION KIT WITH AUDIO AMPLIFIER AND MIC/LINE INPUT

The EDU-H201AUC-KIT is a multi-function AV system designed to provide HDMI video switching, system control, video extension and analog audio amplification, all in one convenient kit for classrooms and meeting spaces.

The system consists of an HDBaseT Transmitter wall plate with two HDMI inputs, a receiver with built in audio amplification and a simple wall plate control panel.

4K video, as well as audio is transported over a single solid core Cat cable between the wall plate transmitter and the receiver. The wall plate control panel provides the customer with an easy to use control interface without use of programming. All power needed for the system is provided by the receiver.

Additionally, the receiver features a built-in web GUI for control. The WEB GUI also supports user and administrator privileges. A user login only provides the control page that can be reached from any device with a web browser
